

# CHIMES MANUAL 1.

## Thank You

Thank you for buying CHIMES. Please feel free to contact us at [shop@cinematique-instruments.com](mailto:shop@cinematique-instruments.com)

## How to install

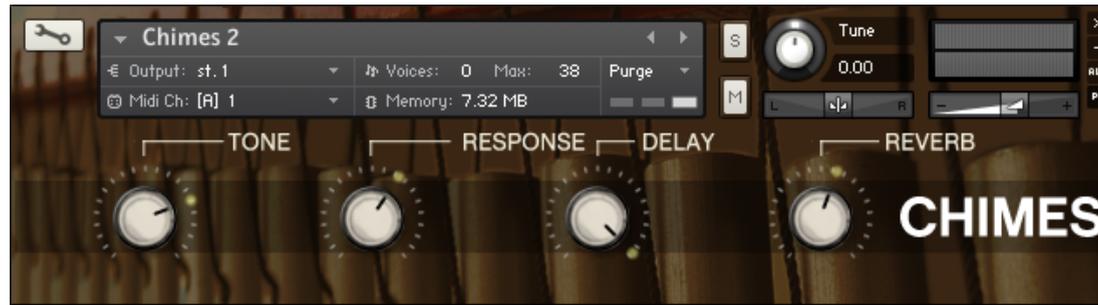

To install, unzip and drag the instrument-folder to any hard drive. Launch Kontakt 4 and load the .nki instruments. Please do not move any file! By installing the product you accept the enclosed product license agreement.

## The instrument

These are solid Bar Chimes - 26 aluminium chimes with silver alloy coating and red wood frame.

## Content

We recorded every single one of the 26 bars and programmed and arranged the real vibrations and response of the bar chimes. You can control the most important parameters (as shown below), though you're free to build your own sound, whether you want solo bar chimes or a mellow glissando sound in the background

Tone: Controls the sound of the single bar from rich (0) to thin (10)  
 Response: Controls the amount of vibration or response of the other bars.  
 Delay: Controls the repetition of the response  
 Reverb: Controls the amount of the reverb.

We wish you a lot of fun with the instrument.
