

## LOW BANDA BRASS

### HOW TO INSTALL

To install, unzip and drag the instrument folder to any hard drive. Launch Kontakt 4.22 or higher and load the .nki instruments. Please do not move any file! By installing the product you accept the enclosed product license agreement.

### DESCRIPTION

Low Banda Brass includes 2 instruments: one single Tuba (we selected the F Tuba) and one single Bass Trombone. Both instruments cover the lowest range of the brass family and stand out with a deep and powerful sound. Currently these two instruments enjoy great popularity - mostly used in Banda Music which is a brass-based form of traditional central American music consisting of a variety of forms, including rancheras, corridos, cumbias, baladas, and boleros. Low range brass is also frequently used in Mexican pop & rock, cumbias as well as polka and traditional German/Austrian music. Whatever you do the Tuba and Bass Trombone, are perfect tools to lend your music a unique sound basis and add roaring power from down below to your productions.

## CONTENT

To keep the data small and the price reasonable we set the focus on the main playing techniques: long, short and staccato notes. In order to achieve a unique, realistic and organic sound we spent a lot of time finding the right microphone setup. We decided on a ribbon and two condenser mics as well as an additional bass drum microphone which was located close to the bell (used for "Tuba Banda div" patch). We recorded up to 5 velocity layer in 3 round robin variations. In order to keep a very authentic sound and feel we decided to keep the tuning as natural as possible. The result is truly impressive and we are now proud and excited to present the Low Banda Brass to you. All rounded up with the CI typical easy mapping and scripting and as always a real stylish design. It is enormous fun to play and you will quickly create fast rhythmical patterns as well as long dramatic melody lines. Low Banda Brass enriches your music with a realistic, organic and unique, deep brass sound.

## 7 PATCHES:

**BsTrom Banda** – Bass Trombone staccato notes, modwheel or velocity varies dynamically the note length, fx and reverb select

**BsTrom Short Combined** – Bass Trombone short and staccato notes, velocity or modwheel varies between short and staccato notes, fx and reverb select

**BsTrom Long** – Bass Trombone long notes, different dynamic layer playable via modwheel or velocity, fx and reverb select

**Tuba Banda** – Tuba staccato notes, modwheel or velocity varies dynamically the note length, fx and reverb select

**Tuba Banda mic** – Tuba staccato notes, modwheel or velocity varies dynamically the note length, fx and reverb select, 2 separate microphone groups: overhead and close to bell

**Tuba Short Combined** – Tuba short and staccato notes, velocity or modwheel varies between short and staccato notes, fx and reverb select

**Tuba Long** – Tuba long notes, different dynamic layer playable via modwheel or velocity, fx and reverb select

We wish you a great deal of fun and inspiration using our instruments.
